The Golf Course Architect may modify any and or all grades shown on these plans in order to achieve the desired finished result in all golf course features. Any change in contractors overall scope of work must first approved by owners.

These proposed grading plans are based on existing topographical information provided by owners.

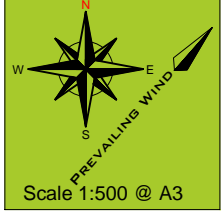

The setting-out must be approved by the Golf Course Architect or his representative on site.

Greens shown on 1:2000, 1:1000 or other scale plans are for general concept only. The 1:250 scale green plans are to be used for detailed construction with supervision from the Golf Course Architect or his representative on site. Green construction is living art which needs a lot of hands-on supervision to achieve the right result.
